Special Issue: Probabilistic and Ensemble Forecasting

Preface 1

The case for probabilistic forecasting in hydrology
R. Krzysztofowicz 2

Short-Term Forecasting

Equifinality, data assimilation, and uncertainty estimation in mechanistic modelling of complex environmental systems using the GLUE methodology
K. Beven and J. Freer 11

Stochastic series lumped rainfall–runoff model for a watershed in Taiwan
C.-C. Lee, Y.-C. Tan, C.-H. Chen and T.-C. Jim Yeh 30

Hydrologic uncertainty processor for probabilistic river stage forecasting: precipitation-dependent model
R. Krzysztofowicz and H.D. Herr 46

Integrator of uncertainties for probabilistic river stage forecasting: precipitation-dependent model
R. Krzysztofowicz 69

Long-Term Forecasting

Considering diversity in precipitation variability when updating seasonal flow forecasts
I. Shentsis and A. Ben-Zvi 87

Insights from a history of seasonal inflow forecasting with a conceptual hydrologic model
D.J. Druce 102

Reservoir optimization using sampling SDP with ensemble streamflow prediction (ESP) forecasts
B.A. Faber and J.R. Stedinger 113

Probabilistic/ensemble forecasting: a case study using hydrologic response distributions associated with El Niño/Southern Oscillation (ENSO)
M.L. Anderson, M.L. Kavvas and M.D. Mierzwa 134

Assessment of Folsom lake response to historical and potential future climate scenarios: 1. Forecasting
T.M. Carpenter and K.P. Georgakakos 148

Assessment of Folsom Lake response to historical and potential future climate scenarios: 2. Reservoir management
H. Yao and A. Georgakakos 176
